

Iris, Pale Yellow

Iris pseudacorus

Iridaceae (Iris Family)

Category:

Prohibited Noxious

Steve Hurst, USDA NRCS PLANTS Database, Bugwood.org

- **Information:** Native to Europe.
- **Life cycle:** Perennial.
- **Root:** Bulbs and rhizomes.
- **Leaves:** Long, linear, dark green. Leaves emerge from ground in fanlike arrangement. Smooth edged, mostly basal leaves are flattened, sword-like with a pointed tip and raised midrib, and erect with upper part arching.
- **Stems:** 90 -120cm tall, round to flattened.
- **Flower:** Large pale to deep yellow flowers have three downward- and three upward-pointing petals, some with light-brown to purple veins or flecks.
- **Seed/Fruit:** Three-angled cylindrical capsule 2-10cm long, contains many flat brown seeds.
- **Toxic:** Horses, cattle, sheep, goats.
- **Control:**
